ESD blue polypropylene handle
100 swabs per bag / 10 bags per case

Product# 7255
ESD blue polypropylene handle
500 swabs per bag / 2 bags per case

Staticide® Polyester Knit Swabs

Reliable precision cleaning

ACL's Polyester Knit Swabs are ideal for environments that need critical cleaning and durability. Available in three styles, including two with ESD polypropylene handles, these swabs are constructed of double-layer polyester knit. This robust material can withstand agitation and is compatible with most solvents and flux removers.

Each of the three styles provides precision cleaning in tight crevices and hard-to-reach areas. They are highly effective for removing IPA, acetone, and other solvents. ACL's non-abrasive, lint-free swabs are low in fiber NVR, ion content and particulate generation making them suitable for cleaning validation and preventing cross contamination.

Ideal for the following applications:

- Medical device manufacturing and assembly
- Electronics manufacturing and assembly
- Biology, chemistry, and environmental labs
- Forensics
- Hospitals

FEATURES:

- ❖ Suitable for ISO Class 5–7 (Class 100–10,000) cleanrooms
- ❖ Class 10 laundered; Class 100 packaged
- ❖ Free of silicon, amides, and DOP contamination
- ❖ Ultrasonic welding; no adhesives or binders
- ❖ White non-ESD handle
- ❖ Blue ESD handle: 10⁸–10¹⁰ ohms

SWAB DIMENSIONS:

Product	Total Length	Handle Length	Handle Width	Head Length	Head Width
7060	6.3" (160mm)	5.71" (145mm)	.126" (3.2mm)	.65" (16.5mm)	.26" (6.7mm)
7232	4.8" (123mm)	3.9" (100mm)	.2" (5mm)	.9" (24mm)	.5" (13mm)
7255	2.75" (70mm)	2.36" (60mm)	.08" (2.2mm)	.4" (11mm)	.125" (3.2mm)
