

7615 Individual IPA Cleaning Wipes

Pre-Saturated General-Purpose Wipes

ACL Staticide® Individual IPA Wipes are an essential item for the field service toolkit. Packaged in a convenient single-use pouch, these pre-saturated towels are ideal for any “on-the-go” cleaning that may arise in a manufacturing environment or out in the field. Safe for plastics and metals, these wipes are great for wiping remote service boxes.

The wipes, made from a blend of polyester and cellulose, are strong, solvent-resistant, and low-linting, making them an effective choice for cleaning printed circuit boards, hardline coax cables, and fiber optic cable splices. They are ideal for touch-up cleaning of automatic and semi-automatic printer stencils during and after production runs.

Using high-purity, electronics-grade isopropyl alcohol, ACL Staticide® IPA Cleaning Wipes are excellent for maintaining the cleanliness of control systems and fiber optic connectors.

Ideal for the following applications:

- Field service
- General industrial cleaning
- PCB workbench

FEATURES:

- ❖ Contains two 6”x 6” wipes
- ❖ 55% cellulose, 45% polyester
- ❖ Hydroentangled non-woven
- ❖ 70% high-purity, electronics-grade isopropyl alcohol and 30% deionized water
- ❖ Flammable
- ❖ Evaporates quickly; non-residual
- ❖ Safe to use on plastic and metal
- ❖ RoHS compliant
- ❖ Made in the USA

Directions:

Tear foil seal from notch. Remove pre-saturated folded wipes from pouch. Unfold, separate, and use individually or keep folded and use together.

For industrial and professional use only. Not intended for medical use.

Read SDS carefully prior to use. Product is flammable. Do not use near sources of ignition, hot surfaces, or on energized equipment
